etc.

- Customers whose bitFlyer accounts have been frozen
- Customers who are unable to use bitFlyer accounts normally due to restriction of account features at the discretion of the Company
- Other customers deemed to be ineligible

■ About Symbol (XYM)

Symbol is an open source blockchain platform developed on the basis of XEM. Native tokens distributed over the Symbol network are called XYM. Symbol is an enterprise blockchain specialized for use by companies, government bodies, etc., and features interoperability and various built-in features that can be linked with companies' existing systems and processes. Designed for use without knowledge of coding, it enables ready achievement of ideal products or services through selection of plug-ins that suit specific needs.

【About bitFlyer, Inc.】

bitFlyer was established in 2014 with a mission of “Simplify the world with blockchain.” We’ve maintained the largest Bitcoin trade volume in Japan. We’re also the only virtual currency exchange operator licensed to operate in Japan, the US, and the EU.*²

Our website: <https://bitflyer.com/en-jp>

*¹ bitFlyer recorded the largest annual trading volume from 2016 to 2021 in Japan (includes spot, net settlement, and futures trading) according to JPBitcoin.com.

*² Based on research by bitFlyer as of June 2021.
